

Arkansas Department of Health

4815 West Markham Street • Little Rock, Arkansas 72205-3867 • Telephone (501) 661-2000

Governor Asa Hutchinson

Nathaniel Smith, MD, MPH, Director and State Health Officer

The Arkansas Department of Health is currently responding to an active outbreak of Mumps that currently is affecting areas of NW Arkansas. The list below includes schools that have confirmed cases of mumps. It does not include schools that only have suspect cases or cases actively being investigated. It is important to understand that the list may expand if new cases are identified. Schools will be removed from the list when the 26 day exclusion period is reached with no additional cases identified in that setting. Any reporting or redistribution of the list should include the report date. The most effective course of action to protect against the spread of the Mumps is to make sure you and your family members are up-to-date on the Measles, Mumps and Rubella (MMR) vaccine.
